

RV-C NetworkFEST

EDUCATIONAL OPPORTUNITY

WHERE: 2007 National RV Trade Show, Louisville, KY, Room C101 (South Wing)

WHEN: November 27, 28, 29, 2007 - during show hours

The 2007 National RV Trade Show will host the first ever “**Network Fest,**” an educational display that will demonstrate the features and benefits of “**RV-C**” (**RV-Complete, a unique RV multiplexing system designed and approved by RVIA technical sub-committees**). The event features RV-C compliant components that are networked together so that attendees can experience them “talking” and sending live signals to each other in real time. Two large LCD monitors will display live activity and fault codes, simulating an RV-C compliant RV.

Some **benefits** of RV-C for RV builders and technicians include:

- RV-C compliant components can interact intelligently
- RV-C separates the control from the appliance
- RV-C simplifies wiring
- Electronic diagnostics are handled through a standard diagnostic connector

There is no charge for attending the demonstration. Knowledgeable staff will be on hand to answer your questions.*

For additional information: Contact Gatie Gore at ggore@rvia.org

**Attendees with show badges will not be charged for entry to the demonstration. All attendees are required to have show badges and some attendees pay show registration fees. Contact Doreen Cashion dcashion@rvia.org for information on obtaining show badges.*

*The Recreation
Vehicle
Industry
Association
cordially invites
you to attend
a live educational
RV-C demonstration*
